# NEMESIS

## Empowering the Changemakers of Tomorrow

[nemesis-edu.eu](http://nemesis-edu.eu)

## WHAT IS NEMESIS?

NEMESIS is an EU project bringing together education and social innovation to develop a model that establishes links between classrooms and local communities, and exposes primary and secondary students to real-life cases of social innovation.

## WHO ARE WE?

We are researchers, schools and social entrepreneurs from seven European countries bringing together education and social innovation to empower the changemakers of tomorrow.

## WHAT IS OUR PHILOSOPHY?

We believe social innovation can play a key role in education as a vehicle to empower young people to drive positive social change regardless of their career path.

We think education should focus on giving students the necessary tools and skills to become critical and active citizens.

We believe learning is a collaborative and collective process that should aim at increasing students' competences to create value for others in their community and beyond.

## WHAT ARE WE DOING?

- a social innovation learning framework
- practical guides and resources for teachers and educators willing to engage with social innovation
- an online platform bringing together students, educators, and social innovators
- resources to break down organizational barriers and facilitate the adoption of the model

## I AM A TEACHER. WHAT'S IN IT FOR ME?

- access to free practical guides and resources
- increases in your students' motivation
- engagement with your local community
- connections with other like-minded educators

## I AM A SOCIAL INNOVATOR. WHY SHOULD I JOIN?

- an opportunity to inspire others
- a chance to share your knowledge with teachers and students
- connections with other European social innovators interested in education
